

# FAQS

## HAZELWOOD REHABILITATION PROJECT

### EXCLUSION ZONES

#### Will I be able to get up close?

To ensure the safety of the community and the relevant workforce, there will be a strictly controlled 500-metre exclusion zone in place around the chimneys, in addition to increased site security controls.

Some road closures will also be required near the former power station, on Brodribb Road, the Yinnar Road and Nadenbousch's Road. Details of these closures and other traffic management is being managed in consultation with both Regional Roads Victoria and Victoria Police.

More details of road closures and traffic control areas will be confirmed and notified closer to the event date.

#### Will I be able to watch the chimneys come down?

There will be no community event in respect of the chimney demolition works.

From the perspective of public safety, Australian Standards require that the demolition works not be promoted as public events. Recent government directions in respect of COVID-19 are a further basis upon which public gatherings associated with the works are strictly prohibited.

Notwithstanding the above, ENGIE Hazelwood recognises the public interest in the demolition of the chimneys, and on this basis, is planning to broadcast a "live stream" via the internet.
